

# Index to Journal of Mineralogical and Petrological Sciences

## Vol.100 No.1-6

### Keyword Index

$\alpha$ - $\beta$ transition	247		
<b>A</b>			
Anatexis	1	Inclusion	237
Atmosphere	184	Interlayer cation	143
Atomic displacements	91	<b>J</b>	
Atomic mean-square displacements	247	Jadeite	70
<b>B</b>		Jadeite + quartz	237
Back arc basin basalt	202	Jadeitite	237
Barroisite	43	<b>L</b>	
Basalt	133	Late pegmatite veins	26
Basic schist	43	Lattice dynamics	91
Bunsenite	159	Lesser Himalaya	175
<b>C</b>		Liebenbergite	159
CK chondrites	116	<b>M</b>	
Calcite III	31	Melanophlogite	247
Calcite polymorphs	31	Melilite	229
Carbonaceous chondrites	116	Melt segregation	1
Chloritoid	43	Metasomatism	150
Contact metamorphism	150	Metatexite	1
Cristobalite	159	Microtexture	237
Crystal structure	229	Migmatite	1
Crystallinity	133	Miscibility gap	70
<b>D</b>		Monoclinic tridymite	55
DTA	55	Mössbauer	229
Dehydration	260	<b>N</b>	
Diatexite	1	Nagasaki Metamorphic Rocks (Japan)	104
Disorder	91	Nambulite	26
<b>E</b>		Nanocrystals	159
Eclogite	70	Neotectonic activity	175
Einstein-Roscoe equation	133	Nishisonogi metamorphic rocks (Japan)	237
Evolution	184	Normal Mid Ocean Ridge	202
<b>F</b>		<b>O</b>	
Ferric iron	229	Oman ophiolite extrusives (Oman)	202
<b>G</b>		Omphacite	70
Garhwal Soils (India)	175	Orthorhombic tridymite	55
Garnet-clinopyroxene amphibolite	104	Oxygen	184
Geochemistry	175	<b>P</b>	
Geopolymer	159	<i>P-T</i> conditions	43
<b>H</b>		Partial melting	1
High pressure	31	Phase transition	55
High-pressure granulite facies	104	Phengite	143
High-pressure metamorphism	143	Phlogopite	150
Higo metamorphic rocks (Japan)	1	Phlogopite hydrate	150
Hydrous carbonaceous chondrites	260	Plagioclase	133
		Precambrian	184

<b>R</b>		<b>T</b>	
Raman spectra	55, 91	Takahama metamorphic rocks (Japan)	104
Reverse zoning	116	Tectonic block	237
<b>S</b>		Temperature dependence	55, 247
Sanbagawa belt (Japan)	43	Thermal metamorphism	116, 260
Sangun metamorphic belt (Japan)	150	Tridymite	91
Sausar Group of India	26	Tschermak substitution	143
Serpentine	260	<b>V</b>	
Sesia Zone (Italy)	70	Vacancy	143
Shock melting	116	Viscosity	133
Shock metamorphism	116	<b>W</b>	
Silicate darkening	116	Western Alps	70, 143
Single-crystal X-ray analysis	31	<b>X</b>	
Sodian nambulite	26	X-ray Rietveld	229
Sol-gel process	159	X-ray structural analysis	247
Stability	31	X-ray structure analyses	55
Synthetic mineral	229	<b>Y</b>	
		Yanomine ultramafic complex (Japan)	150
